

***LineUp With Math™* Alignment to
Utah Mathematics– Math 7 [2002]
Process Standards, Core Standards and Objectives**

Process Standards

Problem Solving

Process Standard

5. Utilize different problem solving strategies including:
- Drawing a picture or diagram.
 - Looking for a pattern.
 - Identifying counterexamples.
 - Choosing an appropriate operation.
 - Guessing and checking.
 - Making a list, table, graph, or equation.
 - Working backwards.
 - Eliminating possibilities.
 - Making a model or simulation.
 - Solving a simpler or related problem.
 - Checking the reasonableness of results.
 - Using proportional reasoning.

***LineUp With Math™* Activities**

- Use an interactive simulator plus calculation worksheets to model and resolve air traffic control conflicts.
- Choose and apply a variety of strategies to optimize the solution of air traffic control conflicts.

8. Estimate solutions to problems and determine the reasonableness of answers by relating them to the estimates.

- Predict and resolve aircraft conflicts and explain results of mathematical calculations and simulations.

Reasoning and Proof

Process Standard

2. Explain and justify problem-solving procedures.

***LineUp With Math™* Activities**

- Predict and resolve aircraft conflicts and explain results of mathematical calculations and simulations.

3. Examine patterns and note regularities and irregularities in various types of problems.

- Use an interactive simulator plus calculation worksheets to model and resolve air traffic control conflicts.

Communication

Process Standard

1. Express mathematical ideas coherently and clearly to peers, teachers, and others.

***LineUp With Math™* Activities**

- Predict and resolve aircraft conflicts and explain results of mathematical calculations and simulations.

Connections

Process Standard

1. Formulate real-world situations that require extended investigations, solve them, and justify answers.

***LineUp With Math™* Activities**

- Apply mathematics to solving distance, rate, and time problems for aircraft conflict scenarios.

2. Establish connections among mathematical expressions, physical models, pictorial representations, and real-world situations.	--Apply mathematics to solving distance, rate, and time problems for aircraft conflict scenarios. --Use an interactive simulator plus calculation worksheets to model and resolve air traffic control conflicts.
5. Recognize and apply mathematical ideas and relationships in areas outside the mathematics classroom, e.g., art, science, other curricular areas, and everyday life.	--Apply mathematics to solving distance, rate, and time problems for aircraft conflict scenarios.
Representation	
Process Standard	<i>LineUp With Math™</i> Activities
2. Represent mathematical concepts using physical models, visualizations, and appropriate symbolic notations.	--Use an interactive simulator plus calculation worksheets to model and resolve air traffic control conflicts.
3. Represent problem situations verbally, numerically, graphically, geometrically, or algebraically.	--Use an interactive simulator plus calculation worksheets to model and resolve air traffic control conflicts.

Standard 2

Students will use patterns, relations, and functions to represent and analyze mathematical situations using algebraic symbols.

Objective 2

Represent, solve, and analyze mathematical situations using algebraic symbols.

Objective	<i>LineUp With Math™</i> Activities
7. Use proportional reasoning to solve problems.	--Use an interactive simulator plus calculation worksheets to apply proportional reasoning to identify and resolve distance, rate, time conflicts in air traffic control.

Standard 4

Students will understand and apply measurement tools, formulas, and techniques.

Objective 1

Understand measurable attributes of objects and the units, systems, and processes of measurement.

Objective	<i>LineUp With Math™</i> Activities
1. Measure a variety of items using both metric and customary units.	--Apply mathematics to solving distance, rate, and time problems for aircraft conflict scenarios.
2. Convert from one unit of measure to another within the same system, e.g., convert miles per hour to feet per second.	--Apply mathematics to solving distance, rate, and time problems for aircraft conflict scenarios.

Objective 2

Determine measurements using appropriate tools and formulas.

Objective

2. Measure length, area, volume, and angles to appropriate levels of precision.

***LineUp With Math™* Activities**

--Apply mathematics to solving distance, rate, and time problems for aircraft conflict scenarios.
